KitchenAid

FOR THE WAY IT'S MADE.

Cooking gestures are invisible ingredients.
They turn inspiration into emotions and emotions
into a masterpiece. It's all about artisanality,
that's why we take it so seriously.

Serious about food

Passionate about cooking

We have something in common.
We are both serious about food.
To us that's not just about creating the ultimate
technology or design.
It's about making tools that allow you to add
your personal expression to your food.
Tools that add a dash of 'uncompromising
pursuit of perfection' to every recipe you make.
A single whisk, sudden faster or a second longer,
can change it all.
The difference between an outstanding performance
and a good dish, it's not just a matter of precision,
it's also a matter of passion.

Art is the only serious thing in the world.
And the artist is the only person who is never serious.
Oscar Wilde

Serious
ABOUT
food

It matters little how much equipment we use;
it matters much that we be masters of all we do use.

Sam Abell

Passionate about cooking

Serious about equipment

Charles Baudelaire said that pure art is the creation of an evocative magic that gathers both the object and the subject, the world outside the artist, and the artist in his subjectivity. KitchenAid was born to be the very outside world to serve your creativity in the kitchen.

This strong commitment is based on three pillars that, like three notes in a harmony, are the perfect expression of professional performances, artisan quality and iconic design. These pillars will support your passion and they will support you every time you will experience yourself in a cooking performance with your KitchenAid appliances.
KitchenAid. For the way it's made.

◎ *Professional performance*

◎ *Artisan quality*

◎ *Iconic design*

◎ *Professional performance*

KitchenAid knows that the power of imagination will always demand tools worthy of what inspires it. We are inspired by what nourishes the cooking passion and pushes us towards new limits to constantly improve ourselves. We are inspired by great master chefs, their techniques and their secrets. We are inspired by professional tools and results that you can find in a Michelin starred kitchen: stainless steel, sous vide cooking, steam ovens and more. Because at KitchenAid we know that only by truly understanding what makes the great ones great, we can offer the power of bringing creativity into your kitchen.

This is the way each KitchenAid tool comes to life.

We put all this effort to reach the professional performance you need in the name of one passion. Your passion.

An acre of performance
is worth a whole world of promise.
Red Auerbach

◎ *Artisan* quality

We are passionate about artisanality, because we believe technology should simplify human work and not replace it. Developing the best technology is not enough for us. Our artisans are adding their dedication and attention to detail to create a masterpiece. This is the most important factor: the human factor.

You love to work with your hands, to dedicate yourself to your dishes focusing on every detail. Similarly, every KitchenAid appliance is created out of our artisans' expert hands. Every piece is minutely checked to achieve a sincere excellence and is projected to reach the highest rank of excellence and satisfaction.

We resolutely believe that what makes our products unique is the human touch in them. KitchenAid people bring their passion and experience in every single gesture to create them, like in a perfect dish. This is the way KitchenAid is made.
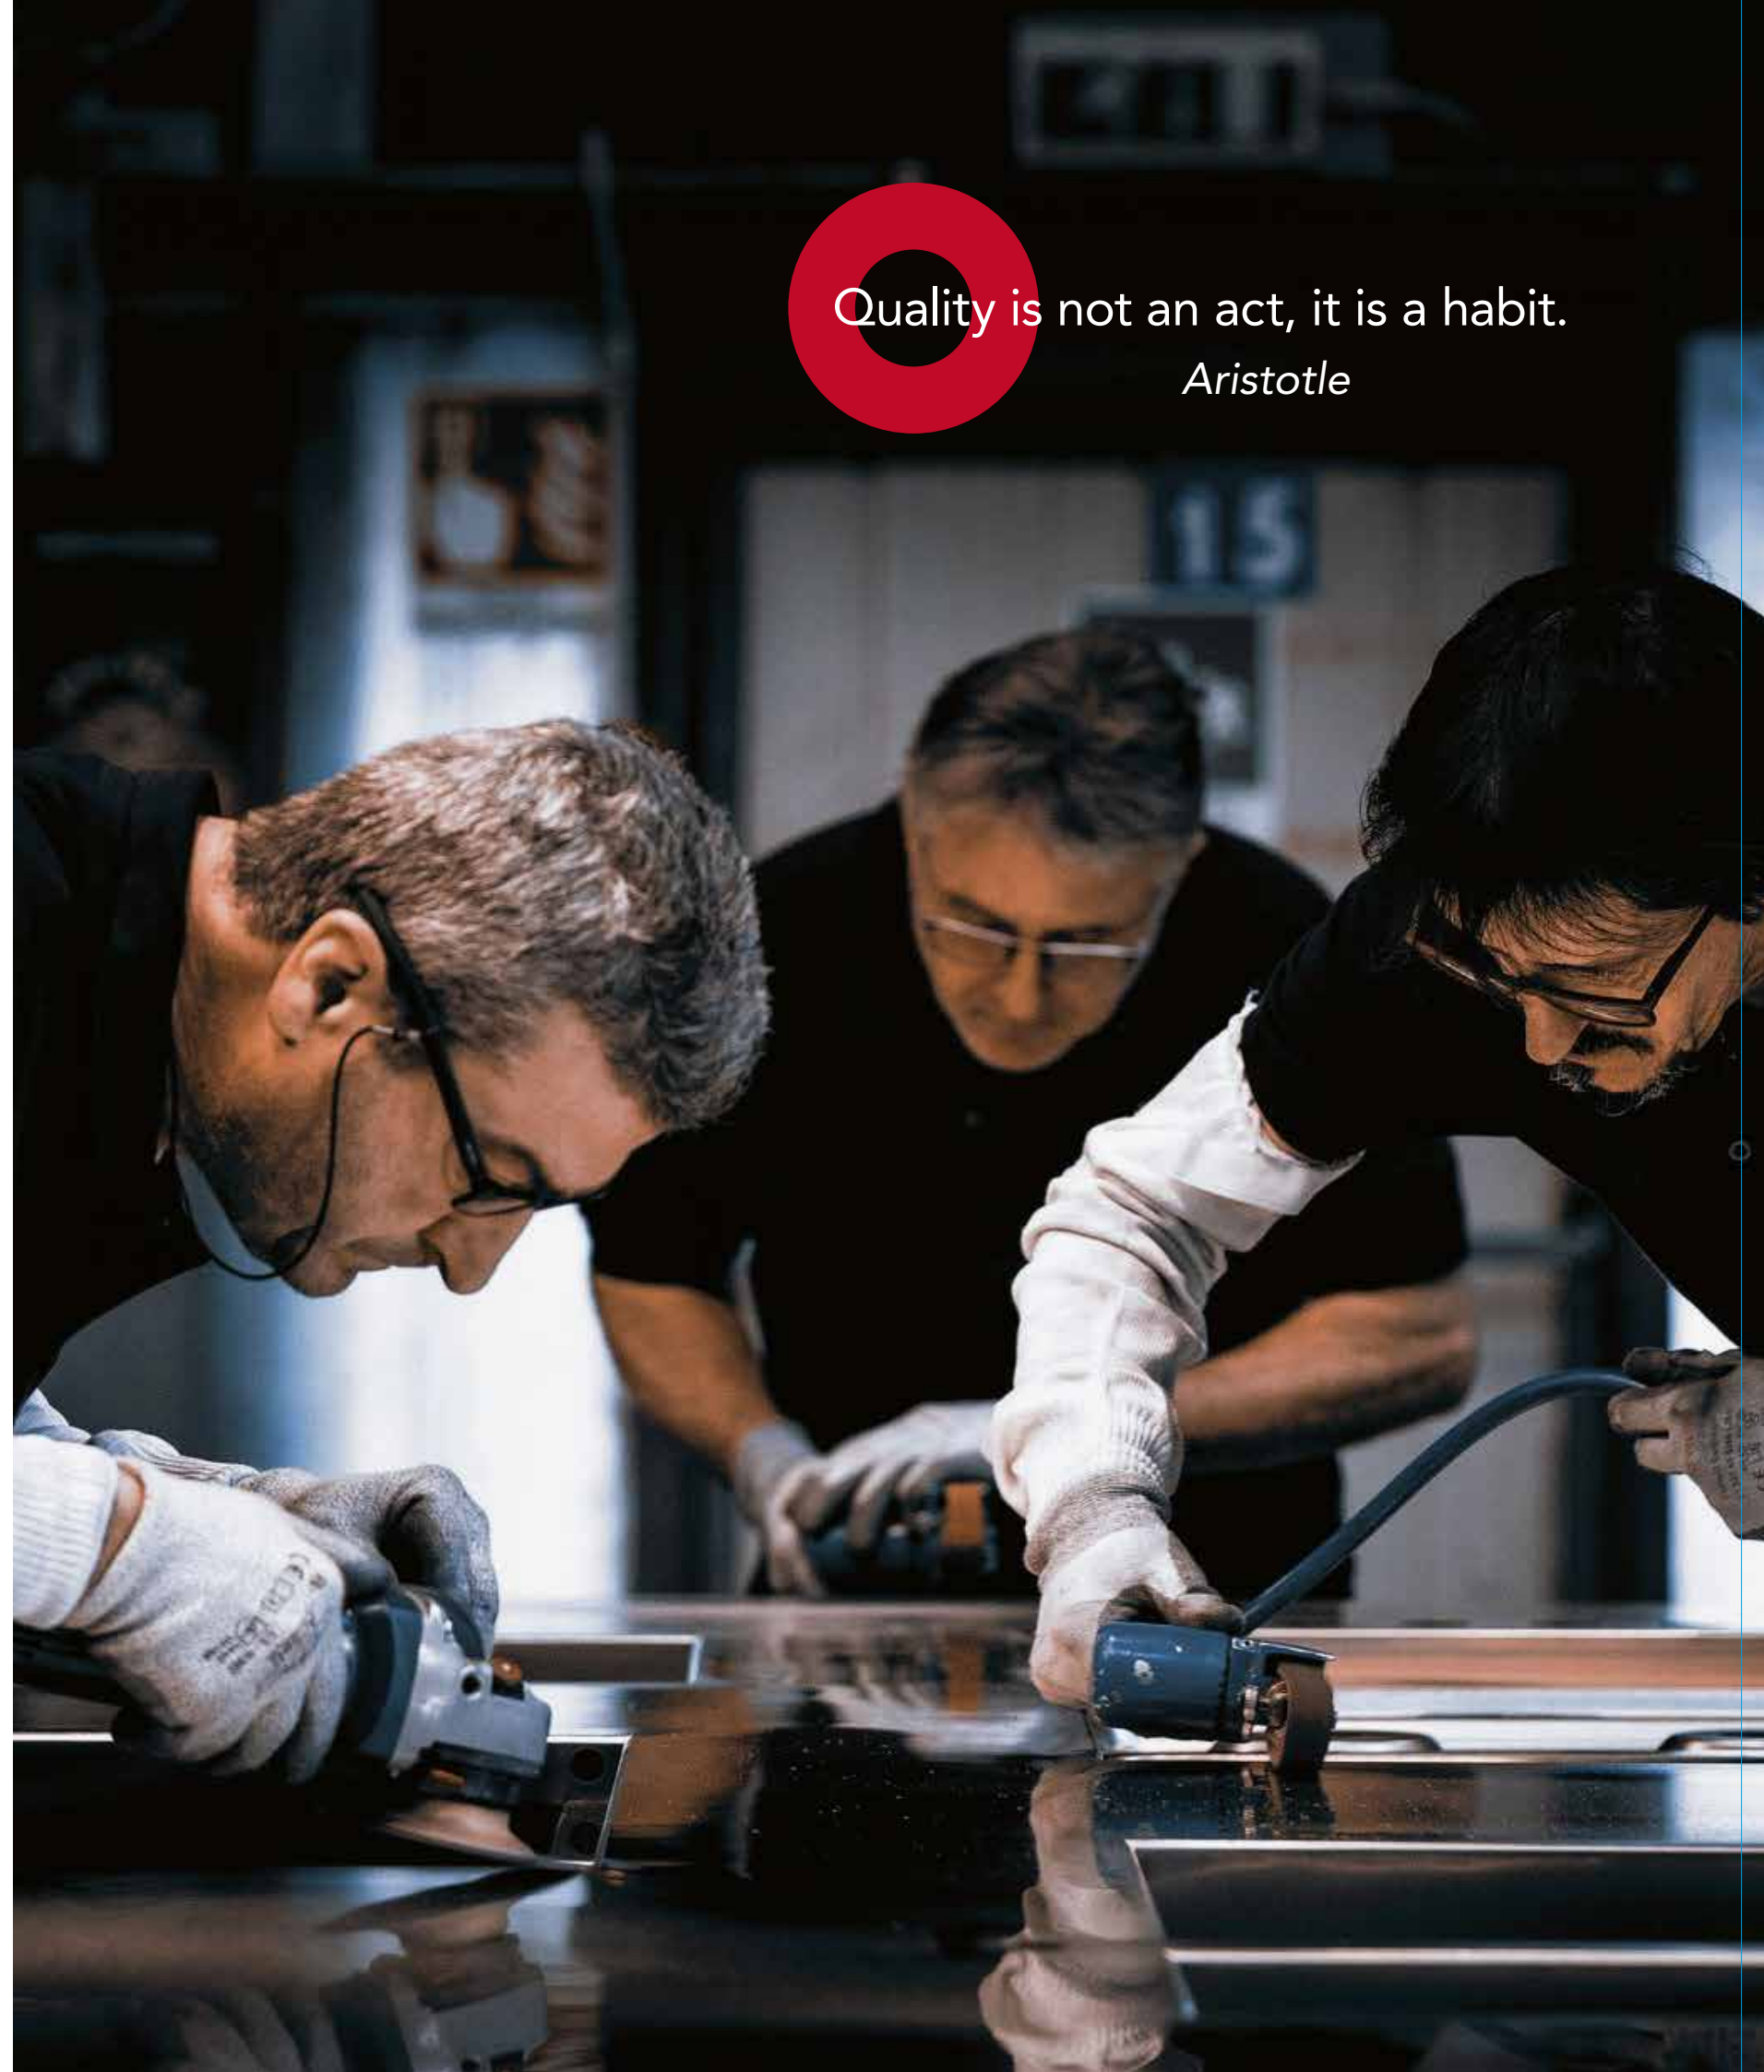

Quality is not an act, it is a habit.

Aristotle

Iconic design

The concept of beauty is a mystery. We relate to it only by the effects of beauty on ourselves. The beauty's fascination is primarily driven by the fact we can find it in the most unexpected areas. This is why we constantly search for it.

In 1936 Herbert Johnston – the creator of KitchenAid – asked designer Egmont Arens to inject beauty into his appliances. The combination of perfectly crafted engines and timeless design gave birth to three new award winning K-models. In 1997 the San Francisco Museum of Modern Art selected the KitchenAid stand mixer as an icon of American design.

This fusion of bold beauty and distinctive functionality is the reference point for all KitchenAid products. We bring to life this fusion, which is visible to the eye, ergonomic to touch, heart-enlightening, to meet your level of perfection. Because we know that to have the best tool in your kitchen is not just a matter of mechanics, it's also a matter of feelings.

There are three responses to a piece of design: yes, no, and WOW! Wow is the one to aim for.

Milton Glaser

1893
THE ENLIGHTENMENT

Herbert Johnston, after watching a baker at work, designed the first household mixer.

1919
THE BIRTH

The H-5 household stand-mixer is firstly introduced. During a product test, the wife of an employee exclaimed "I don't care what you call it, it's the best kitchen aid I've ever had!". The brand "KitchenAid" was born.

"I don't care what you call it, it's the best kitchen aid I've ever had!"

1936
A TIMELESS MASTERPIECE

With the contribution of Egmont Arens, one of the most creative designers of the past century, the iconic model K and its outstanding design, became one of the first appliances to be exhibited in museums of modern arts.

1949
BRILLIANT BRILLIANCE

Based on the bright idea patented in 1893 by Josephine Cochrane, KitchenAid introduces the KD-10 dishwasher in American homes and it will never go out.

1986
A KITCHEN FAMILY

KitchenAid enters the Whirlpool Corporation. All is set to make KitchenAid an international brand.

1989
CREATIVITY WITHOUT BOUNDARIES

From the United States, KitchenAid products spread across Europe, with the first official headquarter located in Belgium.

2007
A KITCHEN FULL OF AID

KitchenAid introduces the "Full Kitchen Resource" concept, whereby proposes a complete range of built-in appliances for the European market.

Cooking with authenticity since 1919

What would we be without our history?
Without those very moments that, although very short, are destined to expand and to define with unfathomable precision what we will become in the future?
Our past transforms us into who we authentically are.
Our past contains the seeds of our future discoveries.

2010

Made to Measure special top

Shaping space around passion

Passion: the trait that, perhaps more than any other, unites us all. Like you, we like to express ours through attention to detail, the exploration of precise movements and love for the creations with which we convey personality, emotion and best materials. Buoyed by this shared enthusiasm, KitchenAid is proud to present, as part of the new collection, its stainless steel made-to-measure kitchen special top: spaces crafted with artisanal attention to detail and shaped around your passions with the newest technology.

Pure, geometric lines become harmonious stainless steel surfaces populated with the very features you crave the most. Skilful hands and artisan processes brought together to give form to unique projects: our made-to-measure special top marry your ideas to our most important quality, our dedication.

That is what we mean when we say:
KitchenAid. 'For the way it's made'.

If I'm a great artisan of the kitchen, it's because I don't buy my sauces.
Alain Ducasse

MADE TO MEASURE SPECIAL TOP

Outstanding
Features

Melding two passions, yours and ours, bringing to life your personal vision of what a kitchen can be, transforming your style into something unique that is destined to endure over time; harnessing all of our craft, to give form to an idea: that is how we create our KitchenAid stainless steel made to measure special top.

○ *Customization*

KitchenAid made to measure special top can be fully personalised. You decide shape and size of your kitchen top, and choose from additional features such as fully-equipped rear splashbacks, raised worktop edges and rounded corners. Choose a solution that matches your concept of what the kitchen should be, adding the components and features that you need to make your dreams a reality: hobs and hoods, the new deep induction trays or even integrated sinks. Your kitchen top can be completed with beautiful wooden accessories such as trays in special holders or knife holders.

○ *Materials*

The stainless steel used for KitchenAid made-to-measure special top has been specially developed to be resistant to corrosion and the effects of harmful substances. With a low carbon content and high levels of nickel and chrome inspired by the professional world, our carefully crafted, brushed stainless steel will lose nothing to time, not even its looks.

○ *Unique design*

A made-to-measure kitchen worktop from KitchenAid gives you a unique piece of contemporary design in your own home, a feature that marries passion to skill and innovation to craft, representing two brands: KitchenAid and, most prestigious of all, you.

Chef Touch
Outstanding Features

At KitchenAid we believe in the fascinating power of culinary intuition. That's why we've created Chef Touch, inspired by the professional world, which combines three high level tools in one system with impressive potential results.

Vacuum Machine

Intuition starts with this device. Experimenting a duck ragu with marsala and radicchio cooked in sous vide pouches at low-temperature that will multiply taste to boost the flavour of your homemade pasta. And then realizing you can do more of it for future enjoyment as foods inserted into the special vacuum-sealed pouches maintain their flavour and nutritional properties intact longer.

Steam Oven

The second part of the magic happens here. In addition to the standard KitchenAid steam oven functions, the steam oven built into the Chef Touch system has a range of functions for sous vide cooking. At a temperature that never exceeds 100° Celsius as in the professional sous vide systems, the dishes prepared with this technique will develop and maintain their succulence and rich flavour, and won't lose any of their nutritional value.

Shock Freezer

A new idea need not be used up all at once. Nor does a meal need to be consumed immediately. With this shock freezer, you can quickly cool or freeze food immediately after cooking so you can stop the cooking process immediately if needed and can shock freeze and store valuable ingredients and ready cooked meals.

And since we know that you want to experiment and prepare better and better results all the time, you can vary the order of using the products - all together or sometimes only one will be needed.

I am incredibly bad at predicting the future; I am only smart enough to observe the present and listen to my intuition.

Chef
Sign

5 ways to express your creativity

Creativity in motion takes on new and unexpected forms. The Chef Sign can change its identity at your command to keep up with you and your delicious creations. From a green asparagus agnolotti to a vegetable tempura, from a herb crusted roast beef to a slow cooked chicken casserole, just consult your creativity.

Boiling / Poaching
Traditionally one of the most popular and convenient cooking methods, now even easier with the Chef Sign. The specially created accessories make it easy to drain pasta and vegetables.

Roasting
With direct and precise temperature control, food typically prepared in an oven can be roasted directly in the multi-purpose pan.

Frying / Deep frying
With the dish-washable steel fry basket, fried food comes out uniformly cooked, light and crispy.

Steaming
The special steaming surfaces over the baskets are ideal for steaming to maintain the flavor of the food, the fragrance and texture, with very limited loss of vitamins and minerals.

Low Temperature Cooking
KitchenAid's technology allows you to set the cooking temperature with great precision, even at low levels, and to maintain that temperature for the set time. With extremely uniform cooking you will be able to preserve the nutritional value and texture of food.

Everything you see I owe to spaghetti.

BLACK STEEL COLLECTION

In the theatre of the sky
the light plays on a black stage.
Andrea Gentilini

Black Steel Collection

Distinctiveness in the universe of cooking.

There is nothing in the universe more special, unique and fascinating than black holes. A single black hole, such as the one in the center of the milky way, can move an entire galaxy, can inspire a brilliant mind to spend a lifetime investigating its mystery. These black celestial bodies push our passion for knowledge to the level of art, of poetry.

When we started thinking about how to push your passion for cooking closer to that limit, we didn't have any doubt. We chose black. Not as a color but as synthesis of that wonder, as a symbol of distinctiveness in the universe of cooking. We created this new range of appliances, in pure black stainless steel with PrintShield™ technology that preserves their beauty from fingerprints, where you will find everything that makes a KitchenAid appliance unique, but with an extra twist: opaque black design. The very color that moves the sun and the other stars, to take your passion into a new dimension.

Wonder is the beginning of wisdom.

Socrates

BLACK STEEL COLLECTION

Outstanding Features

When you enter the new universe of Black Stainless Steel KitchenAid appliances, you will be taking a step forward into a different space. It will be like living in the fifth dimension, where the timeless design of these new appliances, their bold features, their refined geometry, will make your kitchen unique and distinctive.

Distinctive design

Take a step into the unique: with a black twist. That was the impetus for this new range of KitchenAid appliances, with their outstanding, bold, refined taste for design. Each offers not only the professional performance but also the iconic design and artisan quality you are accustomed to. You will find a new, distinctive space for your passion for cooking.

Black opaque texture

It is not a matter of color. It is a matter of substance. Pure black stainless steel, brushed for a unique, warm effect. It is a matter of elegance and style; it is a matter of pushing limits beyond the usual understanding of beauty.

PrintShield™-technology

But black too has its limits: it is easy to leave fingerprint marks on black surface. The unique PrintShield™ technology is an innovative treatment that will protect your appliances from fingerprints and smudges to ensure you an easy-to-clean kitchen, always ready to serve your passion for cooking.

Cooking itself is science;
it is the cook who makes it art.

Take style further with the art of taste

In Jazz, each musician contributes a completely personal style with his or her own instrument. That's what makes it magical. A trumpet joining a trio changes everything, just as when an impromptu dinner is supplemented with the addition of a slow-cooked roast beef that you had perfectly preserved thanks to the shock freezer, or a brunch enhanced with asparagus cooked sous vide.

KitchenAid's special products were created to extend your own personal tastes to every dish your creativity can dream up. Shock freezer, vacuum machine and warming drawer, each designed to add a touch of your own style. Because we know that your style is what provides that unmistakeable touch.

Shock Freezer

Freeze time and see beyond the ideas of the future. Is this not one of the reasons we are driven to create? The power of the creative mind is unstoppable. That's why when we created our shock freezer we added for you two functions to choose from for the exact result you need.

○ *Blast Chilling*

Blast Chilling function rapidly cools the core temperature of oven-hot cooked food to +3°C in less than 90 minutes, thereby reducing bacterial growth and drying.

○ *Shock Freezing*

Thanks to the Shock Freezing function, the KitchenAid shock freezer lowers the temperature at the core of the food to -18°C: cold air cools the food right to the core, transforming the water content into microcrystals without altering the organic structure, so the food retains its original firmness and flavour even after defrosting.

Certain emotions make us catch our breath; perhaps it's because we want to hold on to what we are feeling. Hold on to the emotions you put into your favourite dishes: this is the principle that led us to create our vacuum machine with its special features for you.

○ *Strong Vacuum*

Using exceptionally strong vacuum power in the chamber (reducing the pressure in the pouch to 5mb compared to the 350-500mb typically achieved by standard consumer vacuum sealers) the machine creates the ideal preservation conditions to ensure the longer-lasting freshness demanded by top professional chefs.

○ *Full Touch*

The vacuum machine features an intuitive LED control panel that simplifies vacuum packing. Just press "Bag Cycle" to create a vacuum in the special KitchenAid pouches, or "Container Cycle" when using containers.

○ *Plate & Food Warming*

KitchenAid warming drawers help you to ensure your food is always served on hot plates. They are also invaluable for keeping food warm while you're busy perfecting a particularly tricky sauce, garnishing your dishes, or simply entertaining your guests.

○ *Multi-size*

Inspiration is when something
with no form, turns into a form of art.

Everyone can perform magic, everyone can reach

Ovens

Capture the inspiration and turn it into pleasure

KitchenAid knows that giving a form to inspirations
is the most challenging and fascinating activity we can
experience in life. Part of the experience is to discover
how to turn challenges into learning opportunities.
And it is this feeling that transforms inspiration into
pleasure. It becomes an emotion. It tastes good because
you feel good.

KitchenAid ovens were born to give shape to emotions
and to add to them the sense of taste, your taste. This
is what pushes us to constantly introduce new features
and functions. To innovate our cooking systems creating
new accessories in the way in which every nuance of
your creativity becomes reality.

MULTIFUNCTION OVENS

Outstanding
Features

Just as any creation is characterized by the myriad of details that make it unique, every KitchenAid multifunction oven offers a multitude of features, to marry any facets of your creativity and promises excellent results every time you set to work, like when you challenge yourself in a perfect soufflé preparation.

⊙ *Multilevel Cooking*

With KitchenAid ovens you can place dishes on three levels for evenly cooked food that is perfectly golden brown.

⊙ *Temperature Probe*

The decisive accessory needed for an excellent level of cooking. The degree of heat at the core of the food will be constantly visible on the LCD display of the oven, and once you choose the desired temperature, your KitchenAid oven will keep the same temperature with absolute precision, necessary for your requirements to cook, for example, an ounstanding "pink inside" roastbeef.

⊙ *Telescopic Guides*

Most of the KitchenAid ovens are equipped with telescopic guides to make it easy to look at and taste the results during cooking.

⊙ *Anti Fingerprint Steel*

This special treatment is present in all KitchenAid ovens and will prevent fingerprints, making it easy the cleaning of your oven.

⊙ *Pyro Function*

Save time and efforts with the pyrolitic functions. Reaching up to 500°C the inside of the oven will turn again into a state of total hygiene removing grease, residues and odors. The pyrolitic express cycle enables you to save even more time thanks to a complete cleaning in 1h15.

Excellence is the unlimited ability to improve the quality of what you have to offer.

Rick Pitino

Twelix
Artisan

*Three forms of inspiration
in just one tool*

Arthur Schnitzler said that harmony, intensity and continuity were the three criteria of a work of art. They are also the three principles that inspired KitchenAid creating the Twelix Artisan oven that will make you to cook a perfect dish.

Twelix Convection Cooking

The Twelix technology provides a uniform cooking and perfect browning even in a multilevel cooking, offering you a level of cooking performance previously available only in professional kitchens.

Pure Steam

When food is steamed it maintains its nutritional properties and the intensity of its flavour. It is also maintaining the beautiful colours of your valuable and carefully selected ingredients. When you use the steam setting and the unique steam accessory the oven will never exceed the 100° Celsius, for delicious, juicy, healthy dishes.

Combi Steam

With alternating steam and convection cooking, possible thanks to the 5 'Steam-Assist' functions, you can give your dishes the exact colour, flavour and texture you want, like adding some roast aromas to your dish.

But it's the ability to see something simple in a new way that makes an idea 'art'. That's why the Twelix Artisan oven has additional professional functions specific for baking, plus 18 special and traditional functions and a 73-liter capacity – room enough for all your passion.

I have real admiration for chefs who can maintain an edge and find new inspiration in their cooking after many years.

STEAM OVENS

Outstanding Features

Samuel Taylor Coleridge loved looking to science for new metaphors for his immortal poems. Watching matter change states, he could see the magic of nature at work. Even today, the magic of water turning into steam fascinates those of us who are able to see poetry in unexpected places. KitchenAid Steam Oven, thanks to its many features, is one of that places, where poetry combines with your creativity like tradition combines with innovation, creating a new experience in cooking.

⊙ *Pure steam*

The pure steam generated by a boiler at the side of the oven wraps the food like a cloud giving your purple asparagus with shrimps a new flavor. Nutritious and healthy at the same time, making your risotto great.

⊙ *Sous-vide recipes*

Recipes for Sous-Vide Cooking is a multiple function composed of 10 modes that you can experiment with, passing through the most exciting types of cuisine.

⊙ *Combi steam*

Thanks to a fan inside the back of the oven, your KitchenAid combi steam oven can also combine steam and fan-forced air to cook delicious dishes that are impeccably browned on the outside and beautifully succulent and tender on the inside. Plus, with four levels of steam injection, you are always completely in control.

⊙ *Temperature Probe*

The decisive accessory needed for an excellent level of cooking. The degree of heat at the core of the food will be constantly visible on the LCD display of the oven and once you have chosen the desired level of heat, your KitchenAid oven will keep the same temperature with absolute precision, necessary for you to cook an oustanding Bresse chicken with yellow wine.

⊙ *Anti Fingerprint Stainless Steel*

This special treatment is present in all KitchenAid ovens and will prevent fingerprints making the cleaning of your oven easy.

Weightlessness was wonderful, and I was surprised at how natural it felt.

MICROWAVE OVENS

Outstanding Features

The genius Nikola Tesla said that seeing the universe in terms of energy, frequency and vibration would offer a totally new vision to carry us to a future connected to our own desires, not merely to chance. The energy of KitchenAid microwave ovens is the perfect partner for such a vision, ready to serve your creativity with the highest technological standards.

○ *Sensor Cooking*

The ideal ally, always ready to enhance the flavour of your dishes. Simply select the type of dish you want to cook and the sensor will automatically adjust the microwave's power level and cooking time actively throughout the cooking process.

○ *ProSteam technology*

The perfect way to steam food in KitchenAid microwave ovens. The KitchenAid oven automatically adjusts to direct its low-level microwaves into the Steamer, an included ProSteam technology dish, so you can explore all the healthy opportunities to cook an outstanding steamed salmon with black bean sauce.

○ *Crisp technology*

With this technology you can bake or grill the 75% quicker, thanks to the combination of the three heat sources at your disposal: microwaves, the Crisp plate which reaches a temperature of 210° Celsius in less than two minutes, and the Grill.

○ *3D microwave distribution system*

The 3D microwave distribution system, patented by KitchenAid, combines the emission of waves from different points, so as to ensure homogeneous heating both inside and outside of your dishes.
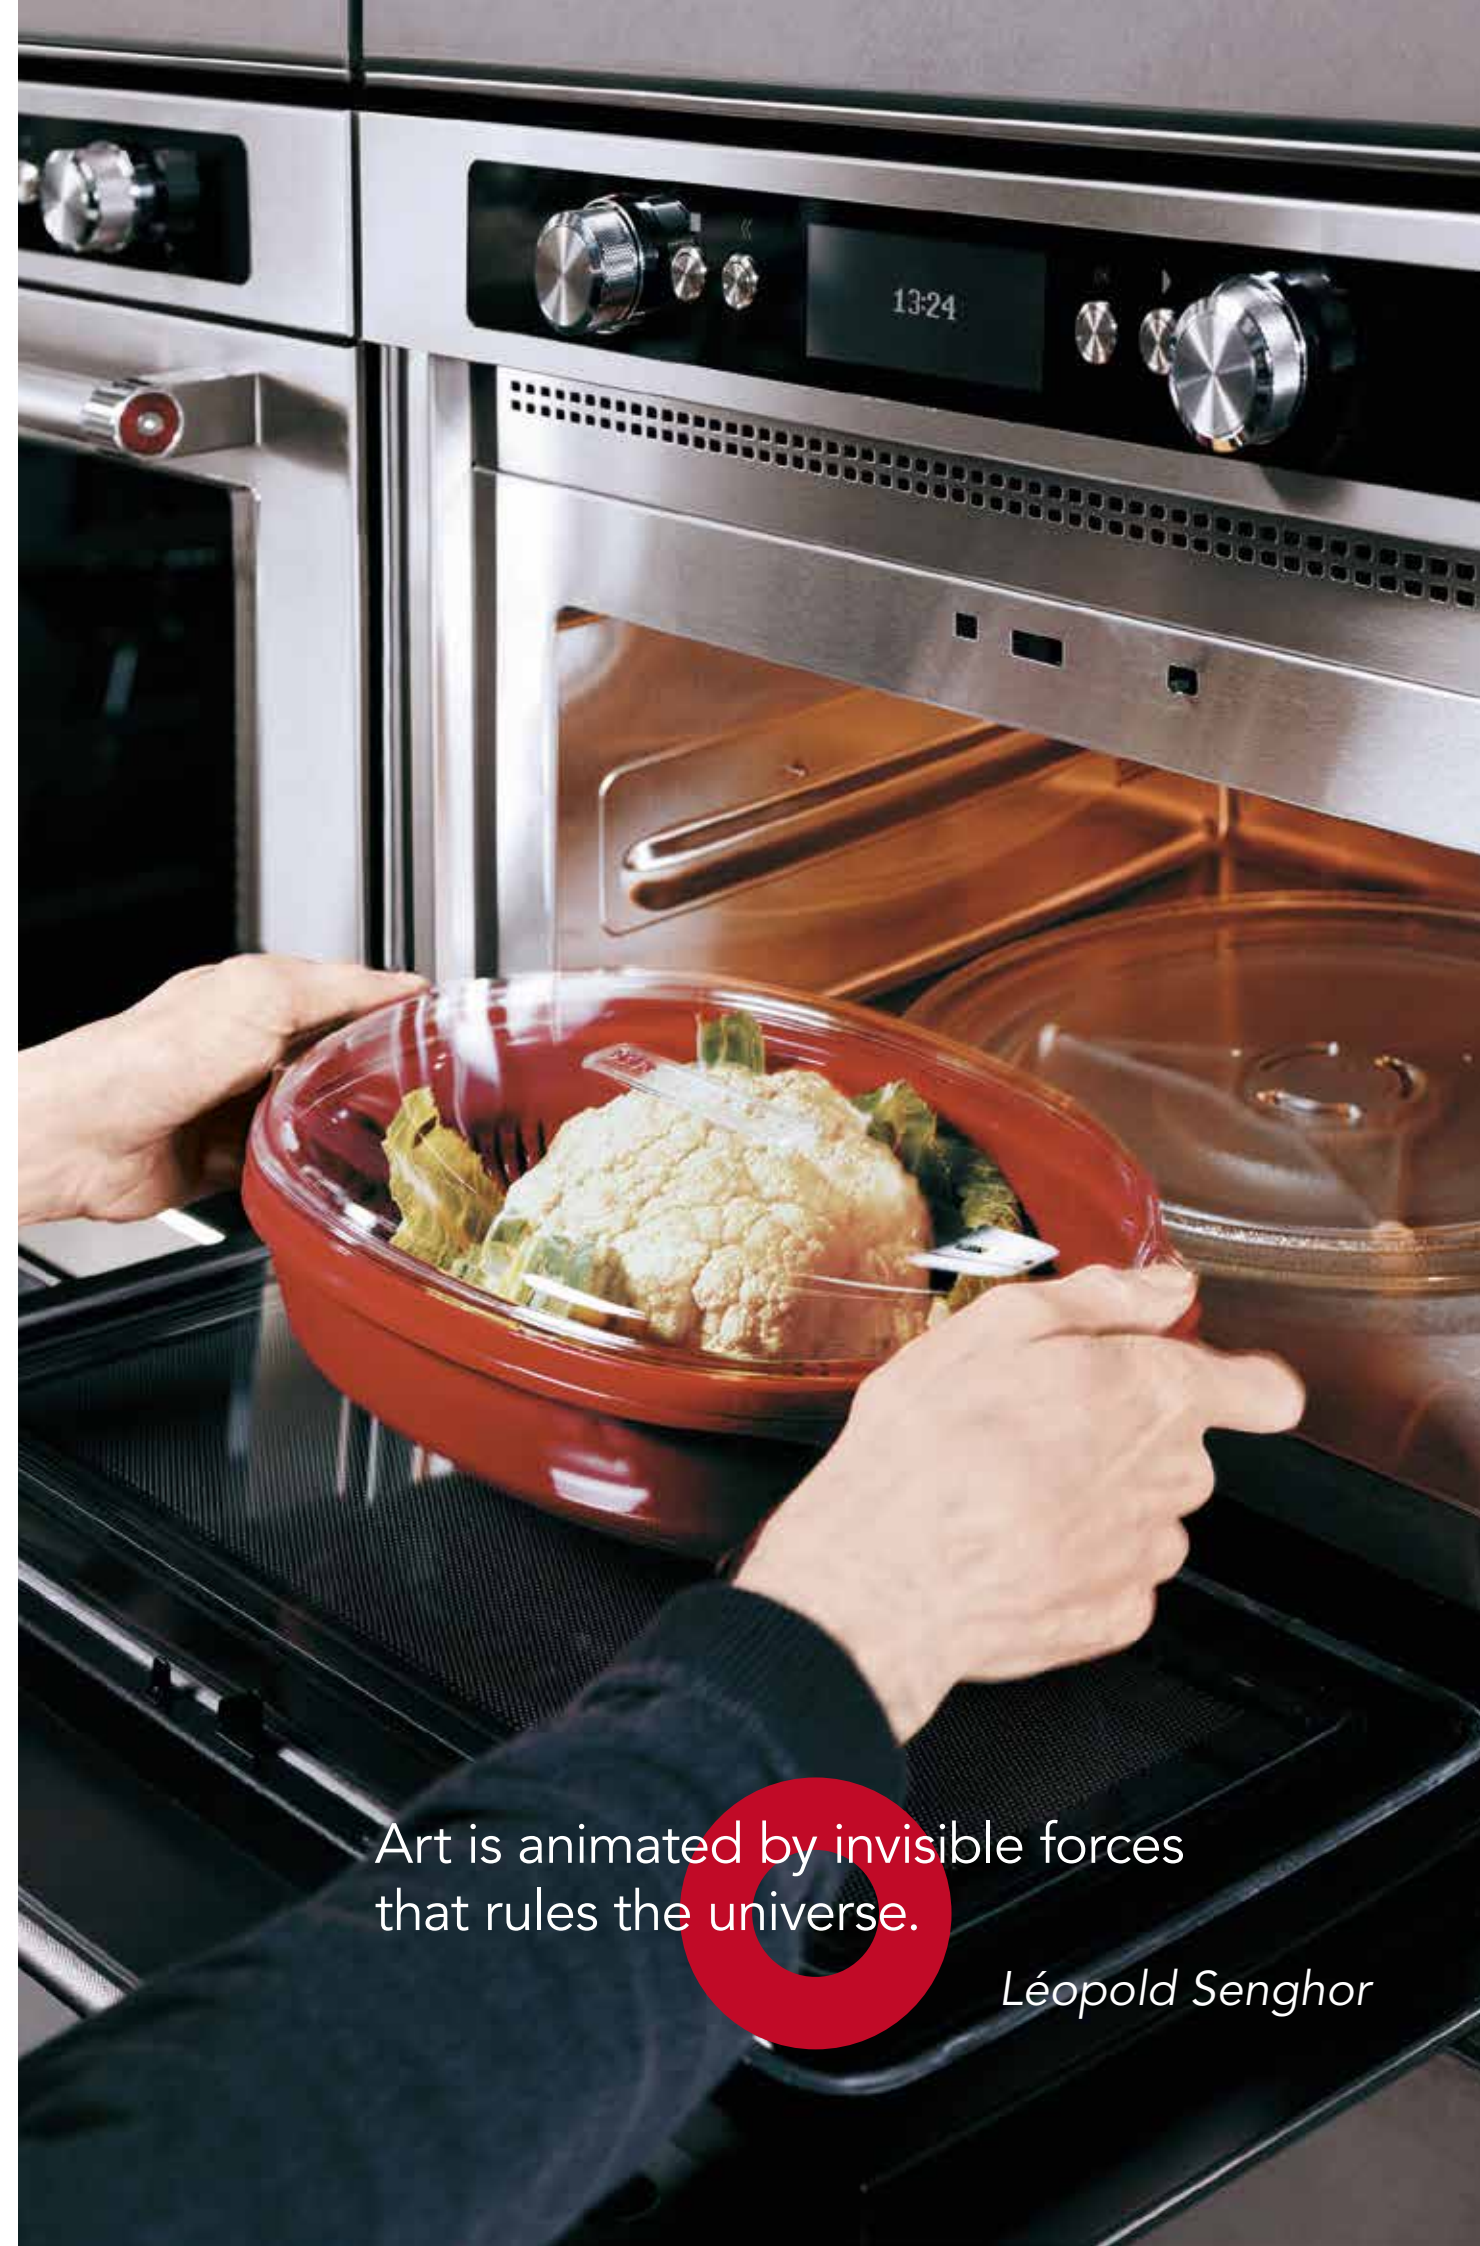

Art is animated by invisible forces that rules the universe.

Hobs

Ignite curiosity with new flavour

Heat sets things in motion: life, the universe and everything. Whatever its source may be, its power is so great that controlling it requires not only precision but real dedication. Only then can heat set creativity in motion. What most inspires you in the kitchen? Is it the heat of a flame, or of electricity, or both together?

KitchenAid hobs are ready to answer this and every question your curiosity can come up with. Because we know that the Maillard reaction is not just about sugars and amino acids. It is about curiosity heating up and about the satisfaction that is the result.

In the end, your creativity - perhaps even your outrageousness - will determine the final result of your dishes.

GAS HOBS

Outstanding Features

Plutarch said that the mind is not a vessel to be filled but a fire to be kindled. Once ignited, the most exciting thing is learning and understanding how to keep it aglow. Each KitchenAid gas hob is designed to have all the features necessary to offer the right flame for your passion.

○ *Double Crown Burners*

With concentric flame rings, our special burners give you powerful, even and controllable heat over a wide area so to enjoy your Cocoa pappardelle with bitto cheese sauce, mushrooms and hazelnuts.

○ *Wok Adapter*

This adapter supports your Wok pan over your hob and ensures that your stir-fry is cooked at the just right temperature, and heats the wok evenly for special Dan Dan noodles.

○ *Standard or "Flush" Installation*

KitchenAid hobs can be installed perfectly flush with your worktop to create sleek design solutions that are utterly in keeping with the style of your kitchen. If you prefer, your hob can have a low profile and be perfectly matched to suit any material or workspace.

○ *Dish-washable Cast Iron Grids*

KitchenAid hob grids can be conveniently washed in the dishwasher, saving you time and effort.

○ *iXelium*

This advanced nanotechnology treatment means the hob surface is significantly more resistant to scratches, yellowing and corrosion than conventional stainless steel, without changing its natural finish.

Cooking is a love story.
You need to fall in love with ingredients and then with people who cook them.

INDUCTION HOBS

Outstanding
Features

It only takes a moment to ignite a creative mind's curiosity. But that curiosity must be nourished with new ideas. That's why KitchenAid induction hobs are designed with a full range of features for your complete satisfaction.

○ *Sensor Function*

The Sensor function is standard on all KitchenAid induction cooktops, and can detect when a pan reaches boiling point. It will let you know with an acoustic signal, then adjust the power so it is just enough to maintain the temperature.

○ *Multisetting options*

Dedicated melting and simmering settings give you the precision you need to get perfect results from delicate ingredients, like butter or chocolate. While the keep warm function maintains food at a constant low heat while you serve. Perfect for your couverture chocolate.

○ *Flexible zone*

This option allows you to link two adjoining zones, making it easier to manage large pots and pans, like when you are cooking a tagliata with rosemary and balsamic vinegar. The zones are activated by a special system that recognises when both areas are sufficiently covered by your saucepan.

○ *Booster function*

The booster function speeds up the boiling of water by increasing power to 3.7kW (or even 5kW in selected models) just until your pot reaches boiling point and your homemade pasta is perfectly al dente.

○ *Power Management*

The special Power Management technology of your KitchenAid induction hob allows you to set the maximum power to suit your home's power supply.

Creativity is thinking up new things.
Innovation is doing new things.

DOMINO

Outstanding
Features

In 1948 the architect Le Corbusier created the Modulor, a system of proportions for designing spaces on a human scale. Today, with KitchenAid's Domino cooking modules, created to offer you different combinations for cooking, you can have a kitchen designed exactly according to your needs.

○ *Teppanyaki*

Created from a unique 7-ply, 4 mm thick blend of metals that makes it perfect for use with KitchenAid induction hobs, this Demeyere teppanyaki gives you the professional results you desire. Great for cooking finely-sliced ingredients quickly before adding a thick sauce or marinade, it's also perfect for use as a Spanish-style plancha for authentic Mediterranean-style meat, shellfish or omelettes.

○ *Wok*

This Demeyere wok is suitable for any heating surface, but it is specially made to work in perfect harmony with the induction hob. Heat is conducted evenly with no risk of burning to deliver the very high temperatures needed for stir-frying finely cut meat, fish, poultry, vegetables and noodles authentically and quickly.

○ *Standard or "Flush" Installation*

KitchenAid hobs can be installed perfectly flush with your worktop to create sleek design solutions that are utterly in keeping with the style of your kitchen. If you prefer, your hob can have a low profile and be perfectly matched to suit any material or workspace.

Life is too short not to eat well.

H O O D S

Each day has a colour, an aroma.
Chitra Banerjee Divakaruni

Hoods

The aroma of inspiration

To play pianissimo you must have fingers of steel,
as Franz Liszt, the famous romantic pianist, liked to say.
This prolific nineteenth-century composer combined
burning passion with dreamlike lightness in his
symphonic poems, sonatas and rhapsodies – chords like
hurricanes and notes like a bird taking flight.

Quiet and steel are also the two fundamentals of
KitchenAid's unique hoods. These two elements fuse
together to create an iconic style with power that
always lives up to your expectations. Because we
believe your kitchen is your concert hall, where the
only smell should be the aroma of inspiration, of your
supremely sizzling creations.

Life is a combination of magic and pasta.
Federico Fellini

Light up your dishes with fresh ideas

An idea is like a spark. Our faces light up with the flash of a sudden new thought. We experience this every time something new flashes into our minds from who knows what mysterious impulse. But every idea is founded on ingredients that already existed inside us, just waiting for that light to come on and draw them out in all their freshness.

KitchenAid knows how certain ideas suddenly appear the moment you open the refrigerator. The spark that sees artichokes, salt cod and bottarga and envisions them combined in a superb, creamy soup. That's why we have given each of our refrigerators all the necessary qualities to keep your precious ingredients absolutely fresh and in the best conditions longer.

Knowing others is wisdom,
knowing yourself is enlightenment.

IMPORTANT

Once completed the appliance may be placed against the wall, taking into consideration though that the door opens at 90° so that drawers may be opened and pulled out. The distance between the side of the refrigerator and the wall is required for the sole purpose of allowing the door to be fully opened (105°).

EUROPEAN SIDE-BY-SIDE

Outstanding Features

Survey all the capacity of your creativity with KitchenAid side-by-side refrigerators, designed for European-style kitchens with features to match your every wish.

○ Shock Freezer

The KitchenAid shock freezer delivers on our promise of professional performances. It cools or freezes preserving the aroma, taste and nutritional value of the food with its two professional functions: Blast Chilling and Shock Freezing. The Blast Chilling function reduces the temperature of oven-hot cooked food to +3°C, good for those recipes where you need to stop the cooking of the ingredients directly. Shock Freezing quickly lowers the food's core temperature to -18°C, good for the texture, taste, nutrition and colour of the ingredients to cook them later.

○ Pro Fresh Technology

Pro Fresh technology constantly monitors the temperature and humidity levels inside your refrigerator. When the door is left open or if you pack the fridge with the weekly shop, it senses changes in temperature and humidity, and quickly circulates chilled air to restore the correct temperature and optimal humidity level.

○ Wooden Interiors

Seasoned oak, high-quality plexiglas and chrome steel are the materials of choice for two stunning new accessories for your refrigerator: a shelf and cheese box that embody KitchenAid's love of design, practical features and versatility.

○ Dynamic 0°

Dynamic 0° guarantees that all fresh produce, meat, fish and dairy are preserved in the optimum conditions in this special zone. Great for preserving your precious seafood when you want to cook some crumbed calamari with lemon and saffron aïoli.

SINGLE DOOR

Outstanding Features

Like time, space is relative. Just remember that between one centimetre and the next there are an infinite number of distances, as the philosopher Zeno observed. The same insight underlies the single-door refrigerators from KitchenAid, designed to have more outstanding features in a relatively smaller space.

○ *Electronic control with digital display*

Easy-to-use control to allow to you to set the refrigerator options easily and immediately, especially with the handy integrated LCD display.

○ *Dynamic 0°*

Dynamic 0° guarantees all fresh produce, meat, fish and dairy products are stored under optimum conditions. Your quality ingredients will always be ready to meet your passion for cooking, for example in a seafood salad with lemongrass and fig balsamic vinegar.

○ *Sensor Technology*

Sensor technology detects any changes in temperature and quickly brings it back to the optimal level. The circulation of chilled air increases automatically to restore the correct temperature five times faster than in a conventional refrigerator.

○ *Wooden Interiors*

Seasoned oak, high-quality Plexiglas and chrome steel are the materials of choice for two stunning new accessories for your refrigerator: a shelf and a cheese box that embody KitchenAid's love of design, practical features and versatility. The cheese box is hugely versatile: it fits above or below the seasoned oak shelf and can be used to store different items, such as dairy products, cold cuts or fruits.

○ *LED Technology*

LED technology delivers a long-lasting, low-maintenance solution for excellent lighting in your fridge.

Recipe has no soul.
You as the cook must bring soul to the recipe.

WINE STORAGE

Outstanding Features

Wine is the perfect partner for both art and good food, and a KitchenAid wine cellar is the tool to enhance both. That's why each one offers all the features necessary for perfect storage of special bottles.

○ **Temperature Zones**

Different temperature zones allow you to store, cool and chamber different kinds of wine at the ideal temperature in the same wine cellar.

○ **Wooden Interiors**

Wine Cellars are equipped with a special system that protects against vibrations to guarantee optimum storage conditions. This system creates a barrier that prevents your bottles from experiencing any harmful vibrations, which could compromise their correct storage.

○ **Natural Ventilation with Active Carbon Filters**

Filtered air circulates continuously around your bottles to prevent mould growth and unpleasant odours.

○ **UV-ray Protection**

This protects your bottles from sunlight, and its UV rays in particular, which can rapidly and irreversibly harm your wines through the oxidation of tannins.

○ **Automatic Humidity Control**

This monitors the hygrometric level to ensure the humidity remains constant inside the wine cellar, ideal for storing your finest vintages.

DISHWASHERS

If you don't follow your dream, who will?

Emeril Lagasse

Dishwashers

Renew the desire to reach excellence

How much power is there behind a blank sheet of paper, a newly stretched canvas, a music staff awaiting the first notes? A raging sea of possibilities for anyone fearless enough to try. Having eyes to see this hidden power is the artist's secret gift. A pearl-coloured platter ready for your creation or a clean saucepan waiting for your creativity to heat up conceal the very same power.

A KitchenAid dishwasher is not only made for 'doing the dirty work' after a perfect dinner. Above all, it is designed to renew again and again the thing that nourishes true passions: inspiration. Because seeing yourself reflected in your own inspiration is the only way to reach excellence.

Mystery creates wonder and wonder is the basis of man's desire to understand.
Neil Armstrong

Great things are done by a series of small things brought together.

Vincent Van Gogh

Small appliances

A creative endeavour, in every way

"Think Small". The most creative advertising slogan of the 1960s. Challenging the conventional exhortation to "think big", advertising guru Bill Bernbach gave voice to the secret yearning of America. The impact was revolutionary. Today, these two small words continue to inspire creative professionals all over the world.

KitchenAid's worktop appliances wouldn't be what they are today if they hadn't found inspiration in this very drive for creativity and innovation. They are designed thinking small, but with all the power they need to meet your most demanding expectations. Challenging conventional design forms to achieve the iconic status we know you are looking for; celebrating, enthusiastically, every facet of your passion for cooking.

Outstanding Features

Simplicity, control and precision come together in the iconic design of KitchenAid.

Glass Tea Kettle

The new KitchenAid Glass Tea Kettle is ideal for brewing your perfect cup of tea, with streamlined glass and stainless steel design. The Glass Tea Kettle simplifies the process of making tea with five preset temperatures and fast all-in-one brewing.

Magnetic Drive Blender

Experience the revolutionary Magnetic Drive Blender, combining groundbreaking innovation, high power and low effort in a unique design.
Our Artisan 'Magnetic Drive' Blender is driven by magnetised turbo power to handle even the most challenging foods, from ice to hard fruits and vegetables. It is this that ensures that tough ingredients are finely ground, and fruits and vegetables are whipped into a smooth consistency.

Artisan Cook Processor

The KitchenAid Artisan Cook Processor is the appliance you've always dreamed of, the one that puts a delicious meal on the table while you put your feet up. It does exactly what it says it does. It handles ingredients like a regular processor, and will chop, knead, mince, emulsify, whip and purée. Then it cooks them the way you would – boil, fry, stew or steam. Beginner cooks will find themselves tackling increasingly adventurous meals. Home-made pastries and bread are a breeze: all that kneading is handled by the machine's special dough blade, in record time.
